MOTIF

North East Institute of Science and Technology

North East Institute of Science and Technology (NEIST), Jorhat (formerly Regional Research Laboratory) is a constituent establishment of the Council of Scientific and Industrial Research (CSIR), which has a chain of laboratories across the country. This laboratory was established in 1961 under the chemical science group of CSIR and originally its main aim was to develop indigenous technologies by utilizing the immense natural resources of northeastern India like Petroleum, Natural Gas, Minerals, Tea, Aromatic and Medicinal plants.

Presently, NEIST is a full fledged multidisciplinary research institution having research areas like Medicinal Chemistry, Natural Products Chemistry, Synthetic Organic Chemistry, Biotechnology, Medicinal, Aromatic and Economic plants, Geoscience, Petroleum and Natural Gas, Applied Civil Engineering, Chemical Engineering, General Engineering, Cellulose, Pulp and Paper, Material Science, Coal, etc. Over the years, the laboratory has produced more than 100 technologies in the areas of Agrotechnology, Biological and Oil Field Chemicals.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management

Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Prateek Hajela, IAS, Director of Census Operation, Assam. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

Preface

The District Census Handbook (DCHB) was first introduced in 1951 Census. This is a publication containing both Census and Non-Census data. The DCHB is a publication where data is sourced both from State Government as well as from the office of the Directorate of Census Operations.

In a DCHB, district wise data at village and town/ Ward level is presented at Community Development Block wise. In DCHBs of earlier Censuses only Primary Census Abstract data was presented alongside the Village directory/Town Directory data. However, during 2011 Census it was decided to bring out two publications of DCHB as Part A and Part B for each district. The Part A will contain various inset tables based on Village Directory/Town Directory data, Part B shall comprise mainly of Census data pertaining to Primary Census Abstract (Rural & Urban) as well as House listing data arranged CD Block wise for each district. This is the first time that the DCHB is coming up with the House listing data in its publication.

The main purpose of DCHB is to disseminate data up to the lowest administrative level of villages in rural areas and wards in urban areas to facilitate micro level planning and development at the grassroots.

The Census Operation in Assam was conducted under the able guidance and supervision of Shri R.K.Das, IAS. I had assumed office as the Director of Census Operations in February, 2014 and by this time collection and compilation of Village and Town Directory schedules for the 26395 villages and 214 towns, including 126 Census Towns had painstakingly been completed. An important aspect of this publication of DCHB is that unlike other Census publications where villages are presented only Revenue Circle wise, this publication of the handbook is presenting villages CD Block wise. For this purpose, the information on CD Blocks was collected from Panchayat and Rural Department of the state Government to arrange the villages accordingly.

The work of collection of Village and Town Directory schedules was done under the supervision of Dr.D.K.Dey, Joint Director and Sri G.R.Saikia, Deputy Director. However, after transfer of Dr. Dey from DCO, Assam, Smt Bharati Chanda supervised the work of compilation, validation and finalization of Village and Town Directory data. Smt Nijora Sharma, Asst. Director guided and co-ordinated the entire staff engaged in the various aspects relating to compilation of the DCHB. Shri J.Ghosh, Sr.Supervisor greatly helped in cross checking and validation of the entire data. Smt. Salma Sahin Laskar, SI-II and Shri Satadal Dutta, DEO also have contributed significantly in bringing out this publication of DCHB by meticulously scrutinizing the data and preparing the manuscripts.

I would like to thank Shri O.M.Singh, Research Officer (Map) and his dedicated team of the Map section for preparing the maps presented in the DCHB.

I am grateful to Dr.C.Chandramouli, IAS Registrar General & Census Commissioner of India for his valuable guidance and his constant encouragement to complete the work within the time frame. I would also like to specially thank Shri A.K.Arora, Joint Director, D.P.Division and his team for their constant technical guidance and co-operation.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

BRIEF HISTORY OF THE DISTRICT

Jorhat was one of the three subdivisions of erstwhile Sibsagar district. The name – Jorhat has a special significance. The word has two syllables – ‘Jor’ means twin and ‘hat’ means markets. The ‘hats’ were Phukanor hat and Machar hat. These two hats were adjacent to Disai. The old name is changed and in its place the new name – Jorhat was given for the erstwhile subdivision of the Sibsagar district.

The early history of the district relates to the stories of Bodos and Shans. Scholars are of the opinion that the Bodo Tribes of Sino-Tibetan origin settled and established their settlements over the valley of Brahmaputra fairly early in the 2nd Millennium B.C. Some Austric and possibly Dravidian tribes produced the Mongoloid Bodos in the tract. The area of the Jorhat district along with Sibsagar district formed part of this tract and covered by tribal settlements of Bodo tribes.

It is believed that the area of Jorhat district, once upon a time, formed part of the great kingdom of Pragjyotish-Kamrupa whose eastern boundary extended up to the river Dikhow especially during the time of Varman rulers of Assam in 7th and 8th century. This political status seems to have continued till the decline of Hindu dynasty. Thereafter several small principalities sprang up under the Barabhuyans and the Bodo Chiefs at the advent of 12th century A.D.

Turning the pages of the Modern history and the history of the Ahoms, we find that the fierce and war-like tribe of ‘Shans’ who passed themselves as ‘TAI’ were a branch of the Tai-race of East-Asia. Ahom historians propagate that ‘Sukapha’ – the first Ahom king, entered Assam in 1228 A.D. crossing the high hills called Patkai. At that time it appears, the area from Dimapur in the South to the Dili river on the north was under the occupation of Kacharis. They had their capital at Dimapur. According to one Dimasa Kachari King, Bisarapatipha was said to be the son of Mahadev. He was a contemporary of Sukapha. Sukapha put the eastern part of the territory of Kachari king under his occupation and drove away the Kachari king to the hills.

The Ahoms in a bid to expand their territory fought battles with the Chutiyas and Kacharis. They extended their territory to the east and the west. A major fierce battle took place between Kacharis and the Ahoms. Ahoms were defeated and driven away as far as Dikhow. But the Kacharis did not get to enjoy the pleasant sense of victory for long. Meanwhile, Suhungmung (1497-1539) popularly known as Dihingia Raja marched up the valley of Dhansiri in 1536 AD and killed the Kachari Raja and sacked the capital at Dimapur. The area of present Jorhat district became part of the Ahom territory since then. It was during the reign of Suhung, the Ahom kingdom reached its greatest expansion and Kamrup and Kamata were liberated from Muslim domination. Suchengpha or Pratap Singha (1603-1641) succeeded Suklengmung constructed a ‘Garh’ on the north and south to protect the kingdom. One part of this Garh is called ‘Mera garh’ in Majuli and the other is ‘Swatalat garh’ in the north and the ‘Ladoi garh’ on the south.

Jayadhwaj Singha (1648-63) had to face Mirjumla’s invasion in 1662. He was succeeded by Chakradhavaj Singha in 1663 who had valiantly earned the laurel of victory over the Mughals in the battle of Saraighat in 1671. On the

death of Chakradhavaj Singha a period of turmoil intervened and as many as seven princes occupied the Ahom throne who were too weak to sustain and as a result the Ahom monarchy fell into untimely end. During the reign of Rajeswar Singha Ahom rule became too weak. He married Kuranganayani, a Manipuri Princess and elevated her to the rank of principal queen. The Mogolu Khat which is at a distance of 6 kms from Jorhat on the west was established by Rajeswar Singha.

In 1757 Jorhat was honoured by a visit from the Ahom king and he had a temporary royal residence. But the town enjoyed the status of Ahom capital when the Ahoms were driven out from Rongpur by Moamoria rules. The period of Laxmi Singha (1769-1780) was the signpost of Moamoria insurrection. The same broke out a new with more devastating form during his successor, Gaurinath Sinha (1780-95) Rongpur was divested by the Morans and the king had shifted the capital from Sibsagar to Jorhat in 1794 A.D. The state of normalcy dawned by the visit of the British at the request of the king. This proved short lived. Gaurinath Singha was succeeded by Kamleswar Singha (1795-1811) a state of great disorder persisted. After his death his brother Chandra Kanta Singha succeeded the throne. During his royal rule the Ahoms had lost the last vestige of vigour and validity as a powerful military race and the nobles frittered away their energies in unseemly feuds and skirmishing among themselves.

Soon the Burmese made it clear and contemplated that they should retain their hold upon Assam by even putting on the throne their own puppet which fomented a fresh spurt of violence and resulted in a reign of terror. Fortunately, Burmese were compelled to renounce all their claims on Assam by the British. As a result the treaty of Yandaboo of 24th Feb, 1825 came into being. Subsequently Assam was added to the dominions of East India Company. By a proclamation in 1839 two districts namely Lakhimpur and Sibsagar were formed with Jorhat as a sub-division. Present Jorhat district is formed with two sub-divisions – Majuli and Jorhat.

Jorhat is one of the important cities of Assam along with Guwahati, Dibrugarh and Silchar. Jorhat acts as a gateway to upper Assam and to the state of Nagaland. Jorhat has many firsts to its credit in different spheres. Jorhat was the first town of the Greater Assam installing electricity supply in 1923. The first aeroplane on north-eastern soil was landed in Jorhat in 1928. Jorhat Gymkhana Club is the oldest golf course in Asia and third oldest in the world. The first stadium of Assam was built in Jorhat. The world's oldest and largest Tea Experimental Station is located at Jorhat. The first non-government college of Assam J B College was established in Jorhat. The city has many research institutes, including the world's oldest and largest Tea Experimental Station, North East Institute of Science & Technology, Rain & Forest Research Institute, Central Muga Eri Research Institute and universities like Assam Agricultural University & Kaziranga University. Now Jorhat is a rapidly developing city and one of the major business & commercial hubs of Northeast-India. Its population has now increased to more than 0.1million. The recent urban development of Jorhat has seen the rise of several high cost apartments and flats with people flocking in from all parts of the state making it truly a cosmopolitan City.

It was the last capital of the Ahom Kingdom and home to many historical monuments of Assamese culture. In the north of the district, the Brahmaputra River forms the second largest riverine island of the world, Majuli, which spreads over 924.6 square kilometres with a population of about 150,000. The island, threatened with constant erosion by the mighty and unstable Brahmaputra River, had been the principal place of pilgrimage of Vaishnavites since the age of the Ahom rulers. Several Sattras (monasteries) resembling those of medieval times are headed by Satradhikars teaching Vaishnavism, which was introduced by Srimanta Sankardeva (1449–1568). Each Sattra has an unknown wealth of Vaishnavite scriptures and extensive revenue-free lands cultivated by the Bhakats (celebrated monks) of the Sattras. The cultural diversities which prevailed in Jorhat nearly a century ago has inspired the people to participate in cultural activities through the decades and as a result Jorhat has been able to produce many creative writers, musician, actors, historians and journalists, terming Jorhat "**The Cultural Capital of Assam**".

The city today has evolved to be one of the major commercial and business hubs of the state with growing numbers of shopping malls, restaurants, hotels, residential apartments and educational institutions. The city also serves as the base for tourism to famous places such as the Kaziranga National Park and the World's largest river island Majuli. Centrally located within the state, the city depicts a vibrant Assamese township and culture, making it one of the most preferred places for local people to conglomerate.

This town was a flourishing and commercial metropolis but completely destroyed by a series of Burmese invasions of Assam between 1817 and the arrival of the British force in the year 1824 under the stewardship of David Scott and Captain Richard.

The British Rule, though not free from rebellions and revolutions, contributed to the reemergence of this historical town. From the very first decade of the British rule, revolutionaries like Gomdhar Konwar, Jeuram Medhi, and Piyali Phukan emerged. The British system of administration came into vogue in the year 1839 with an established Police Thana. During the great Sepoy Mutiny, Maniram Dewan and Piyali Barua were hanged in public at this very place in 1858.

In 1885, a narrow gauge railway, Jorhat Provincial Railway, became operational. In time, this contributed to the rapid growth of the tea industry.

Although, the Civil Sub-division under Sivasagar district at Jorhat was formed in 1869, it was declared the administrative headquarters of the undivided Sibsagar district in 1911. The undivided Sibsagar District comprised the present Sivasagar, Jorhat, Golaghat district and parts of Karbi Anglong district. Major A. Play fair served as the first Deputy Commissioner. Presently, Jorhat is being modernized with many new commercial and non-commercial establishments. The old families of this ever prosperous city have transformed the city into a bustling and a well organised entity.

During the Second World War, Jorhat was one of the main supply depots in support of allied forces fighting in China. 'Flying the Hump' of the Eastern Himalayas out of Jorhat with C-37 cargo planes and P-51 fighter support (Flying Tigers) was a regular occurrence.

ADMINISTRATIVE SET UP

The Deputy Commissioner of the district is the over all in charge of the administration of the entire district. He also acts as the collector in case of revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election officer in case of conduct of Election, as a Principal Census Officer while conducting Census and so on. A number of officers like Additional Deputy Commissioners, Sub-divisional officers, Extra Assistant Commissioners, and others assist the Deputy Commissioner in looking after the administration of the district. At lower level each Sub-Division is headed by one sub-divisional officer whereas under him there will be Revenue Circle Officers for each revenue circles who are responsible for the entire administration of the area under their respective revenue circles.

For the administrative purposes, the district is divided into three sub-divisions viz, Jorhat (Sadar), Majuli and Titabar. Again each sub-division is divided into revenue circles and under revenue circles there are Mauzas comprising villages of all kinds. In the district there are only 6 revenue circles and 848 villages. The names of revenue circles are Jorhat East, Jorhat West, Titabar, Teok, Mariani and Majuli. In the district there are 8 Community Development Blocks. The district consists of 11 towns which includes 4 Statutory Towns and 7 Census Towns. There are 10 Police Stations in the district .It has 111 Gaon Panchayats in all. Jorhat district covers an area of 2851 Sq.Km. (Rural: 2758.82 Sq.Km and Urban: 92.18Sq.Km.)

District Highlights - 2011 Census

- In Jorhat district there are 6 Revenue Circles and 8 CD Blocks which comprises 848 villages including 85 uninhabited villages.
- In the district, Jorhat West Revenue Circle is the most populous having 211539 persons while Mariani is the least populous Revenue Circle having 131613 persons.
- Among the CD Block, Jorhat CD Block has the highest number of population with 256811 whereas the lowest is found in Ujani Majuli CD Block with 68847.
- The district comprises 11 towns: 4 Statutory towns and 7 Census Towns. Jorhat (MB + OG) is the most populous with 97946 persons while Nowsolia Gaon (CT) is the smallest in population with 4312 souls.
- While the highest number (133) inhabited villages is found in Titabor CD Block and lowest inhabited villages (69) is found in Jorhat East CD Block.
- The largest village by population is Meleng Grant Gaon with 8572 persons which is situated at Jorhat Central CD Block and the smallest village is Barhoipam with 2 persons under Jorhat Central CD Block.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 along with a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand

states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and

monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

-4-

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
